5. Manpower: The large increase in manpower throughout the NFIP as well as intel related activities will draw HPSCI attention in general. We have to be prepared to justify all our increases. Action: Each Directorate.

7. HPSCI will desire a status report on where we stand with cover and what progress has been made; are we having any problems. Both Congressmen Robinson and Zablocki will be interested. Action:

8. Another item of interest to the entire Committee is the security of our personnel overseas as well as our installations--a statement as to what measures we are taking to give our personnel added security as well as installations and their vehicles. It has been not lost on some Committee members that the economy K cars, when loaded down with armor, have little or no guts or speed, hence become "walking targets." Action:
